

Chemical Applicator Tool (C.A.T.)

Introducing The Geerpres Chemical Applicator Tool (C.A.T.)

Since 1935, the tools chosen by professionals have come from GEERPRES!

The Geerpres Chemical Applicator Tool (C.A.T.)

with optional chemical refill stand and C.A.T. clean out fitting.

Our heavy duty backpack is ergonomically designed with adjustable straps for desired fit and features a reinforced opening.

Geerpres refillable chemical bags are sturdy, reusable *, easy to fill and install. Bags can be filled with virtually any non-acid floor care chemical. Max liquid volume is 1.5 gallons. * *Do not mix different chemicals in the same Geerpres chemical refill bag*

The Geerpres Chemical Refill Stand can be affixed to most flat surfaces or use The Chemical Refill Wall Mount Bracket (#4555W) for wall mounting. Using the funnel fill makes it easy to use in almost every cleaning environment.

The 5' C.A.T. Clean Out Fitting is a great option when a pressurized cleaning is necessary. Fits most standard faucets in commercial janitor sinks.
