

# ADVANTEX® ABSORBING SPILLS & LEAKS SOLUTIONS

## Advantex® LeakLocker™ Pad & Advantex® Spill Mop

### THE CHALLENGE

Spills and leaks on facility floors pose serious safety and cleanliness concerns. High-traffic facilities that generate large volumes of waste face an ongoing challenge in trash collection. Leaking liners not only soil trash bins but also contaminate floors during transfer and transport. Spot clean-ups for unexpected spills are often inefficient, especially when relying on buckets and wringers.

### THE SPILL SOLUTIONS

**Advantex® LeakLocker™** pad is designed to tackle trash spills and pooling liquids in waste receptacles caused by leaking liners. Simply place a LeakLocker™ pad at the bottom of the bin before securing the liner. Each pad absorbs up to 128 oz. (1 gallon) of water-based fluids in minutes or over days.

For fast spot clean-up, the **Advantex® Spill Mop** offers a quick and effective solution, absorbing up to 32 oz. of liquid in minutes—no bucket required.

#### Advantex® LeakLocker™

The 14" x 14" Advantex® LeakLocker™ pad is designed to absorb 128 oz. (1 gallon) water-based spills in minutes. It is ideal for placement in waste receptacles or any collection container to absorb leaking and pooling liquids. Utilize the LeakLocker™ for several days until it reaches full capacity with no drips or leakage when removed from waste receptacles or utility bulk box truck. (100 pads per case). Patent Pending #63/549269 **MODEL #4841**

#### ADVANTEX® SPILL MOP

Compatible with the 16" Advantex Mop Frame (Model #4713) and standard Velcro® flat mop frames. Designed for quick response cleaning, it absorbs up to 32 oz. of fluid in just 2–4 minutes—without the need for a bucket or wringer. The mop securely contains liquid, preventing drips or leakage from the floor to the trash.

**MODEL #4830**
