

# GRIPIT TOOL HOLDERS & KITS

Grip It. Store It. Find It Fast.

Gripit's patented tool holders deliver simple, reliable wall storage for a wide range of tools. A high-friction roller automatically adjusts to the handle diameter—press the tool in to lock it, lift to release.

Made from high-impact plastic, Gripit holders are strong, durable, and spring-free, installing in minutes to keep tools accessible and reduce clutter. Mount them directly to walls or pair with the Gripit Bar Track, which lets holders and hooks slide for quick, customizable positioning. Each bar includes mounting holes (screws included) and 16"-on-center spacing for easy stud alignment.

Gripit systems are widely used by stadiums, theaters, arenas, restaurants, and other facilities that need efficient, organized cleaning equipment storage.

## Standard Gripit

Ideal for mops, brooms, hammers, and similar tools with handle diameters up to 1 3/16"

## Expando Gripit

Designed for heavier tools—such as hoses, shovels, and vacuum wands—with handle diameters up to 2"

## GRIPITS & UTILITY HOOKS
