

# Advantex™

## Mops and Wipes

Microfiber technology offers many benefits for efficient cleaning. Instead of pushing dirt and moisture across a surface, microfiber locks and lifts both away from a surface.

#4832 Advantex™  
Disposable Microfiber Mops

Advantex™ Microfiber Mops and Wipes have been designed with total cost in mind. Both can be used as a disposable or limited use product in applications where laundering poses additional risks of contamination. While these microfiber products can be relaundered, this is not practical or recommended in many applications.

#4842 Advantex™  
Disposable Microfiber Wipes

Product ID# 3910/0616

### Features

- Microfiber Cleaning Performance: Ensures superior removal of both visible and nonvisible particles.
- Quat Safe: Will not neutralize traditional quaternary ammonium disinfectants.
- Bleach Safe: Will not damage the fibers or hinder performance in any way.
- Contains No Cellulose, Cotton or Rayon, leaving no food source for bacteria.
- Single-Use: Eliminates cross-contamination risks in critical applications.
- Ideal for use on all sensitive surfaces in critical environments.
- Brings adequate fluid to the surface for proper disinfectant dwell time.
- Wipes are processed in a Class 5 Cleanroom, bulking the wipes and giving them increased absorbency and particle holding power.

### Dimensions

**Disposable Microfiber Mops:**  
18"L x 5"W

**Disposable Microfiber Wipes:**
