Case Study – University of Rochester Storester

Impact

- · Scheduling methodology saved 2 hours in travel time per floor, per day
- 1 hour/day gained in each staff member's productivity = 48 hours/day
- \$325,000+ year in staff labor savings
- · 45% decrease in troubleshooting and customer complaints
- · Automated collection of documentation and daily events for compliance
- Empowered staff, increased performance and personal accountability
- · ROI in less than 4 months, including start-up costs

"With Virtual Manager, we have seen a return on investment within four months, with that being extremely conservative. It is almost impossible to add up all the efficiencies that this tool can bring to your organization. There is no other product out there that can do everything that this product can do. It is easy to use, supports management and senior leadership with the reports that are provided. It's a winner!" Mark Schwartz – Director of Medical Center Facilities – University of Bochester
