

# Champ® Plastic Bucket & Ultra® Plastic Downpress Wringer

## CHAMP® PLASTIC BUCKET

The Champ® Plastic Buckets are made from foam polymer material that can easily withstand years of continuous wringer action.

The single-bail design virtually eliminates bail pull-out and pinched hands. Built-in bumper keeps bails and casters from damaging walls. Double-raceway, ball-bearing casters add stability and maneuverability. Unique double-wall design keeps bucket sides smooth and free of protruding supports. Champ® Plastic Buckets without bail are approved for high security/prison applications.

## ULTRA® PLASTIC DOWNPRESS WRINGER

Constructed of nylon reinforced with fiberglass, the Ultra® has the strength and basket capacity to handle large 32 oz. mops.

The solid steel gear shaft helps give the Ultra® what it takes to handle the toughest mopping job. The smooth, hard surface offers superior resistance to staining and abrasion. The Ultra® is 25% lighter and less bulky than other plastic wringers and has an unmatched operating efficiency.

The High-Security style Ultra® is designed to meet the special needs of correctional institutions and other security-sensitive facilities. Features include a permanently pressure-fit handle, gears that are secured by one-way screws, no springs, and a high-density nylon body that delivers superior strength and impact resistance.

### CHAMP® PLASTIC BUCKETS

Model #	Description
2526	26-quart Gray on 3" Casters
2535	35-quart Gray on 3" Casters

### ULTRA® DOWNPRESS WRINGERS
