

Healthcare Cleaning Solutions by Geerpres®

Comprehensive Integrated Cleaning Solutions

In business for over 80 years, Geerpres® offers a comprehensive approach to cleaning solutions, specializing in the healthcare industry. Our system includes EVS carts, mopping systems, Advantex® microfiber (single-use) products, EVS management software, and air disinfection technology.

Geerpres® is focused on driving labor efficiencies, providing premier products, and reducing HAIs in an environmentally conscious manner.

Geerpres® delivers an integrated system that includes

- Premier, innovative equipment with proven, warranted quality.
- Advanced supplies, providing cleaner, safer environments.
- Labor efficiency in products and technology.

Product Limited Warranties

For the period listed below, from the date of purchase, if any of these products proves defective in materials and/or workmanship during normal use by the original purchaser, Geerpres® will provide, at their discretion, repair or replacement providing all care and Maintenance procedures have been followed.

LIFETIME Limited Warranty Products:

- Enterprise® EVS Carts
- Casino 'Slot' EVS Carts

10-Year Limited Warranty Products:

- Buckets: Stainless Steel
- Wringers: Stainless Steel
- Project Trolley
- Orion Stainless Steel Cart

5-Year Limited Warranty Products:

- Wringers: Zinc-plated
- Buckets: Galvanized

Microfiber Solutions: From the Floor Up

HAI Prevention Using Engineered
Single-Use Microfiber Solutions

THE ADVANTEX® ADVANTAGE
FROM THE FLOOR UP – THE BATTLE TO CONTROL HAIs

THE FLOOR COULD BE THE WEAKEST LINK IN FIGHTING HAIs
Pathogens are consistently introduced to the floor throughout the day by shoes, transport equipment such as wheelchairs and beds, treatment devices or computer carts, and non-slip patient socks that traverse the floors and frequently, directly into a bed. More importantly, there is a consistent potential for cross-contamination on the floor by an item expected to be clean and often handled without gloves, a freshly laundered mop.

FINANCIAL IMPACT
It was estimated in 2009 that 1.727 million HAIs occurred in hospitals in the United States that year resulting in 98,987 deaths, a rate of 5.8%.*
There were 29 million patient stays in hospitals during 2009.
• Average HAI cost of \$1,628 per admission.
• Total HAI cost of \$46.3 billion, represents 11% of total hospital spend in 2009.*

THE GEERPRES® SOLUTION
ADVANTEX® GB MICROFIBER APPLICATOR SYSTEM
The Advantex® GBs, large capacity removable tank makes mopping easy. The dual outlet dispenser to provide uniform application and flow control. The frame swivels 360° to reach tight spaces. Patent pending.

ADVANTEX® MOP FRAME
Utilizes micro hook and loop fastening, ideally suited for the Advantex® Single-Use Microfiber Mop.

ADVANTEX® SINGLE-USE MICROFIBER MOP
Best-in-class, single-use microfiber mops. Eliminate the risk of cross-contamination.

RESEARCH REVEALS MICROFIBER LAUNDERED MOPS CAN RETAIN RESIDUAL PATHOGENS
During a survey of five Cleveland-area hospitals, researchers found floors in patient rooms to be frequently contaminated with HAI pathogens including *Clostridium difficile* (C. diff), found in 44% of rooms cultured after patient discharge cleaning and 53% with the patient housed in the room.*
In eleven Arizona hospitals, a study to examine the effectiveness of bundling cloth and microfiber reusable towels used in cleaning and disinfection of rooms after terminal discharge of patients, revealed that viable microorganisms were found on 93% of the towels after laundering.*

THIS STUDY EVALUATED LAUNDERED MICROFIBER MOPS FROM ELEVEN HOSPITALS AND FOUND THAT 27.3% OF THE NEWLY LAUNDERED MOPS CONTAINED MICROBIAL CONTAMINATION, INCLUDING HAI PATHOGENS.

Financial Implications of HAIs

- 1.74 million HAIs in the USA (2002) resulting in 98,987 deaths (5.8%).
- 39 million patient stays (2009)
 - Average HAI cost - \$1,024 per admittance or \$23,735 per HAI incident.
 - HAI cost - \$40.3 billion (11% of total hospital spending in 2009).
- CMS penalties of \$538 million (2017), impacting 2,588 hospitals.
- 1% reductions in Medicare reimbursement in 2017 for 769 hospitals.

70% of HAIs are preventable, a potential cost savings of \$28 billion.

From the Floor Up – “Fear the Floor”

Pathogens are consistently introduced to the floor throughout the day by shoes, transport equipment, treatment devices or computer carts, and non-slip patient socks.

Cleveland Area Hospital Study – 5 Locations

- *Clostridium difficile* (C. diff) found in 44% of rooms after discharge and cleaning.
- 53% found while patients still in the room.
- Of 100 occupied rooms, 41% of high touch objects had contact with the floor.

Arizona Hospital Study – 11 Locations

- 93% of laundered product tested positive for contamination.

Non-slip Socks Study

- 85% on socks and 69% of floor samples tested positive for VRE.
- Patients contaminate their beds upon returning to their room.

**Laundered/Washable
Microfiber Flat Mop
VS.
Single-Use Microfiber Flat Mop**

Comparative Analysis

Laundry Process

- Reduces the efficacy of microfiber products
- Does not eliminate cross-contamination pathogens

Cross-Contamination

- Ineffective wash processes reintroduce contaminated laundered mop back into a facility

Performance

- Removal of bio-burden is superior with virgin microfiber
- Floor coverage meets/exceeds patient room size requirements

Disinfectant Compatibility

- Launderable microfiber and most single-use microfiber are not disinfectant compatible

Environmental Impact

- Advantex® is 71% post-consumer recycled material
- Waste is nominal and can be recycled
- Advantex® is proven superior in environmental impact versus laundered mops

	Washable	Advantex® Single-Use
Reduces Detergents & Disinfectants by More Than Half	✗	✓
Delivers Disinfectant Without Neutralizing It	✗	✓

Challenges with Laundered Microfiber Mops

What makes microfiber good makes it bad to launder.

- Microfiber's cleaning properties make it difficult to release bioburden or pathogens in the laundry cycle.
- Microfiber allows detergent accumulation from repeat laundering.
- Laundering processes damage delicate microfibers.

Retained contamination may include bacteria, viruses and spores.

- These can and will survive inadequate or uncontrolled laundering processes.
- HAI implications result from harmful pathogens returning to your facility in a perceived "clean and sanitized" laundered mop.

Laundering Process - Current Reality

- Cross-contamination/HAI potential
- Insufficient quantities on-hand or inconsistent inventory controls
- Unknown mop origin (alternative hospital)
- Ineffective, aged, or melted mops
- Poor microfiber quality
- Unpredictable contracts and costs
- Constant chemistry waste
- Loss/replacement and disposal waste
- Required management time for reusable mop program
- Adverse environmental implications of laundered mops versus single-use options

Launderable Microfiber Mop Magnifications

At 1000x magnification, re-laundered “clean” microfiber flat mops reflect melted fibers, bio-burden and residual contaminants reintroduced to the environment.

400x magnification reflects retention of unknown particulate.

Laundered Mops Are Bacterial Reservoirs

Laundered Mop
(Clean and Examined)

6/24/20

C. diff

Pollen

Clostridium tentani

Pathogenic Risks Using Laundered Microfiber

- 3 of 11 hospitals (27.3%) reveal returning HAI pathogens in clean laundered mops.
- 50% (3/6) of laundering services reflect adverse results (process failure).
- **35% of the laundered mops tested retained microbial contamination.**

Disinfectant Compatibility

Comparison Overview

A CDC study found that quaternaries are good cleaning agents, but organic materials such as cotton can make them less microbicidal because insoluble precipitates absorb the active ingredients, otherwise known as “binding” the chemistry.

Solution for Controlling HAI Pathogens

Advantex® Single-use Microfiber Mops provide **100%** of original-strength disinfectant from the charging bucket to the cleaning surface or floor **100%** of the time.

	INITIAL Neutralizing QUATERNARY AMMONIUM Disinfectant reaching floor from test mop	1 HOUR Neutralizing QUATERNARY AMMONIUM Disinfectant reaching floor from test mop	3 HOURS Neutralizing QUATERNARY AMMONIUM Disinfectant reaching floor from test mop	INITIAL Neutralizing CHLORINE Disinfectant reaching floor from test mop	1 HOUR Neutralizing CHLORINE Disinfectant reaching floor from test mop	3 HOURS Neutralizing CHLORINE Disinfectant reaching floor from test mop

Competitor Single-Use Mop	PASS FAIL	FAIL	FAIL	PASS FAIL	FAIL	FAIL
Laundered Mop	FAIL	FAIL	FAIL	FAIL	FAIL	FAIL

Detergent and Disinfectant Compatibility

Can the Impact Be Quantified?

Advantex® Single-use Microfiber Mop

- 10 – Advantex® mops require only 1.5 gallons (5.6 liters) of chemistry solution.
- Chemistry remains active and effective indefinitely.

Laundered Mops

- 10 – Laundered mops require 4.0 gallons (15 liters) of chemistry solution.
- Chemistry is neutralized almost immediately, impacting an entire “charge” of mops.

Coverage Performance

MOP Absorbency and Application Efficacy											
MOP	Dry Wt. (g)	Wet Wt. (g)	Solution Absorbed Wt. (g)	Post Application Wt. (g)	Solution Delivery (g)	% Fluid Release	Floor Coverage (sq. ft.)	Solution Waste (g) per Use	% Fluid Waste	Quat Binding (1 Hr)	Quat Binding (3 Hr)
ADVANTEX®	18.8	168.9	150.1	24.9	144.0	95.9%	250	6.2	4.3%	NO	NO
Brand B	15.7	122.6	106.9	24.5	98.1	91.8%	168	8.7	8.9%	YES	YES
Brand C	13.2	141.0	127.8	37.6	103.4	80.9%	185	24.4	23.6%	YES	YES
Brand D	13.1	138.8	125.7	39.1	99.7	79.3%	178	26.0	26.1%	YES	YES
Brand E	22.8	205.1	182.2	68.1	137.0	75.2%	245	45.3	33.0%	YES	YES
Brand F	16.2	137.1	120.9	46.3	90.8	75.1%	158	30.1	33.1%	YES	YES
Brand G	12.5	130.9	118.4	48.6	82.2	69.5%	147	36.1	43.9%	YES	YES

Laundered Mops	94.0	496.0	402.0	342.0	154.0	38.3%	267	248.0	161.0%	YES	YES

- Advantex® offers the highest coverage of any single-use mop! Patent pending.
- Launderable mops offer greater floor coverage but waste more cleaning solution than is actually used, which carries an increased operating cost.

Are You Wasting Disinfectant?

FLOOR MOP ABSORPTION COMPARISON

The Advantex® Advantage	Amount of Disinfectant to charge 10 mops	% Solution Release	% Solution Waste	After Charging Neutralizing QUATERNARY AMMONIUM Disinfectant	After Charging Neutralizing CHLORINE Disinfectant
Advantex® Single-Use Mop	0.5 gal	96%	4%	PASS (660 ppm)	PASS (500 ppm)
Competitor Single-Use Mop	0.5 gal	59%	41%	FAIL (<660 ppm)	FAIL (<500 ppm)
Laundered Mop	2.5 gal	38%	62%	FAIL (<660 ppm)	FAIL (<500 ppm)

Pass/Fail grade is based on the Centers for Disease Control and Prevention's recommendations of 660 parts per million of quaternary compatibility ammonium disinfectant or 500 parts per million of chlorine disinfectant. All mops were placed in clean charging buckets with equal amounts of disinfectant. The original disinfectant was 660/500 parts per million, respectively.

Bio-Burden (Soil) Removal

Glo germ/flour tests using various types of mops.

- Inexpensive but subjective.
- Single-use mops have a higher contact surface.

Lab Report 129

- Advantex® Mop removed soils better than new and laundered microfiber mops.
- Advantex® Mop is proven to provide a 3 to 4 log (99.9% to 99.99%) removal of bio-burden.
- New, reusable microfiber mops lose their efficacy to remove bio-burden through repeated wash and dry cycles.

Environmental Implications

Waste Considerations / Recycling Possibilities

Solid waste generated from Advantex® mops equates to 18 grams per mop.

In a fully occupied 500 bed hospital -

- Each staffed hospital bed creates 33 pounds/day of solid waste (4,396,425 pounds annually).
- Advantex® would produce approximately 41 pounds/day of solid waste (a 0.25% increase in waste generation).

Only Advantex® can be recycled, when processes become available as the scale of the single-use product increases.

- Advantex® contains 71% post-consumer material.

Life-Cycle Environmental Analysis

Study performed by Dr. Richard Venditti, College of Natural Resources at NC State University. He conducted an environmental impact life cycle assessment comparing reusable microfiber mops to the Advantex® Single-use Microfiber Mop.

Summary

The Advantex® Single-use Mop has significantly lower environmental impact than does the reusable mop in every environmental impact category in the EPA TRACI model.

Report Model

Each type of mop was evaluated for 100 uses. The **Advantex® Single-use Mops** were each used one time then disposed of after transporting 20 miles to an incineration facility.

The **reusable mop** was used one time for each application, followed by a washing and disinfection step, followed by drying. The reusable mop was cleaned, dried, and transported 40 miles daily and then to an incineration facility. Cleaning of the reusable mop included the use of a washing machine and both detergent and bleach.

Life-Cycle Environmental Impact

The Advantex® Single-use Mop represents a fraction of the adverse environmental impact in comparison to laundered/reusable mops.

Summary

Microfiber Solutions: From the Floor Up

HAI Prevention Using Engineered Single-Use Microfiber Solutions

See our complete case study at www.geerpres.com/advantex-advantage/advantex-hai-solution/

A Refresh of the MOST Important Factors

- Total annual HAI cost of \$40.3 billion (2009)
 - 4.5% of patients discharged are afflicted with an HAI
 - Average cost of \$23,735 per HAI incident
- 5.8% fatality rate resulting from HAIs
- Significant CMS penalties
- 1% reductions in Medicare reimbursement for “repeat offenders”
- Up to \$147 billion in direct/indirect, non-medical social costs

ADVANTEX[®] Advantage

Our entire Advantex[®] product line is systematically designed for all healthcare/clinical, terminal, cleanroom, and food service applications.

Advantex[®]

Single-Use Microfiber Mop

Standard Features

- Significantly lower environmental impact than laundered mops (see life-cycle analysis)
- Compatible with all healthcare disinfectants, including quats, chlorine and peroxides
- Manufactured in an ISO 6/1000 cleanroom
- Non-linting, USP 797 compliant
- Covers 250 sq. ft. per mop
- Best-in-class solution volume delivery with the least waste of any similar product
- Microfiber performance with effective, consistent bioburden/bacteria removal (3-4 log)
- Efficient cleaning impact in comparison to laundered mops
- Patent pending

Please see our complete line of Advantex[®] products at geerpres.com

Advantex[®] Single-Use Microfiber Wipes

Standard Features

- 10" x 12" canister wipes are constructed of 48 GSM hydroentangled, synthetic microfibers
- 12" x 12" flat and ¼ fold wipes are constructed of 70 GSM hydroentangled, synthetic microfibers
- Compatible with all disinfectant solutions
- Tremendous absorbency and release in a durable, single-use and low-cost wipe
- Allows for your choice of chemistry

Please see our complete line of Advantex[®] products at geerpres.com

Soft Cost Benefits

- Heightened sensitivity and awareness of infection prevention
- White mops provide immediate employee feedback on mop efficacy
- New white mops improve patient perception of staff's tools
- Point-of-use storage – inventory control
- Process improvement with laundry stream management
- Great staff engagement and efficiency
- Reduced staff turnover, training costs

Benefits of Single-Use Mops and Wipes

- Microfiber efficacy, achieving optimal infection prevention
- Eliminating risks of cross-contamination
- Patient safety and reduced HAI risks
 - Full-strength disinfectant applied with each use
 - Undamaged microfiber with each use
 - Virgin, bacteria-free, microfiber mops in each use
- Staff engagement and operational efficiency
 - Reduces management time and labor vs. laundering
 - Offering a laundry-free, effective, microfiber cleaning solution
- Environmentally conscious with nominal solid waste
- Favorable impact on patient satisfaction (HCAHPS)
- Reduced waste (disinfectants, applications, energy, water)

Advantex® High Duster Solutions

High Duster Tool and Advantex® High Duster Sleeves

- Telescoping aluminum high duster tool for reaching high places
- 55" handle easily extends up to 92"
- Sleeve ensures dust, lint and small particles will catch with ease
- Microfiber High Duster Tool Kit includes handle, high duster frame, and microfiber sleeve
- Interchangeable wand and mop frame allows for wall wash utilization
