

Seaway® Galvanized Oval Bucket & Seaway® Sidepress Wringers

SEAWAY® GALVANIZED OVAL MOP BUCKET

The Seaway® Galvanized Oval Mop Bucket is hot-dip zinc galvanized after fabrication to seal all seams and provide maximum corrosion resistance.

Reinforced bands and a rolled rim add strength. Bail folds flat on the rim providing extra protection against wringer wear. 2" casters optional.

SEAWAY® ZINC-PLATED SIDEPRESS WRINGER

Sidepress action wrings the mop from top to bottom. Removes more water with less effort and removes water uniformly from the mop.

For extra durability, a hardened steel bushing supports the solid steel drive shaft where it enters the side plate. Easy top-to-bottom squeezing action forces water from the mop down into the bucket, minimizing overflow. Accommodates virtually all popular string mop sizes (12-32 oz.) and can be used on a wide variety of buckets, including plastic models.

Reinforced steel bottom band for stable operation and reduced bucket wear.

** Mixing zinc-plated and galvanized products with stainless steel products will void the limited warranty due to a chance of galvanic reaction.

Revised 0421

SEAWAY® GALVANIZED BUCKET

Model #	Description
2104	26-quart without casters
2103	26-quart on 2" Casters
2108	35-quart without Casters
2107	35-quart on 2" Casters

SEAWAY® ZINC-PLATED SIDEPRESS WRINGERS

Model #	Description
1100	Zinc-plated Sidepress Wringer (12-32 oz. mops)
