

Procedure for Charging Advantex® Single-use Mops

Purpose: This procedure will provide guidance on the proper method for charging mops for daily cleaning and disinfection. In addition to this procedure, always refer to your facility guidelines for further information.

Recommended Products:

- Personal Protective Equipment (PPE)
- Facility approved wet mopping system
- Facility approved charging bucket
- Disposable microfiber mops
- MAINTEX Action 256 or Neutral Cleaner

Procedure:

• PREPARE

Place your charging bucket by making sure it is on a flat and stable surface.

- a. If possible, keep charging bucket on cart
- b. Don PPE, gloves and eye protection needed

• LOAD

Gently place mops in to the charging bucket with logo facing upward

- a. If possible, keep charging bucket on cart

• FILL

Add MAINTEX Action 256 to charging bucket to level of mops

- b. Note chemical level should be just to the top of the mops
- a. Mops should not be submerged and or floating in solution
