

ADVANTEX LOO-MOP

EXCLUSIVELY OFFERED BY GEERPRES®

The sustainable Advantex Loo-Mop is a toilet brush with bamboo handle, comprised of 100% biodegradable materials. Durable for multi-use through a single-use design, the Advantex Loo-Mop reduces waste (versus plastic toilet brushes) and cross-contamination risks.

MODEL #4855

FEATURES & BENEFITS

- Improve EVS cart cleanliness, eliminating toilet brush buckets, drips and spills
- Biodegradable multi-layered, 4" diameter mop heads made of durable cellulose fibers
- Avoid the risk of disposable pads clogging toilets and drains
- 14" long overall and 1.5 oz. each with a slightly curved handle to reach crevices

SUSTAINABILITY MATTERS: Bamboo Facts

Rapidly Renewable Resource: Bamboo regrows and replaces itself quickly, reducing the demand for fast-depleting materials like lumber.

Biodegradable: Bamboo is biodegradable and 100% compostable within 2-6 months.

Pest-Resistant: Bamboo is easy to grow and extremely tough, meaning it can be grown without pesticides or chemical fertilizers that can cause harm to the soil and water supply.

Saves Water: Growing bamboo requires no irrigation, which saves water.

Produces Oxygen: Bamboo produces more oxygen than equivalent trees. It's also carbon-neutral, helping offset the effects of climate change.
